MART NETWORKS GROUP

Delivering Tomorrow's Technology, Today.

www.mart-networks.com

Mart Networks is one of Africa's Pioneers when it comes to Value Added Technology Distribution.

Mart was founded in 1995 in Nairobi, Kenya based on a foundation to provide value to the partner eco system.

From humble beginnings, Mart has grown working with leading vendors providing distribution of disruptive technology across the African continent and recently investing in the Middle East distribution landscape.

Our aim is to bring vendors and partners together and create a seamless ecosystem simplifying the supply change journey and transfer of technology from the vendor to the end customer.
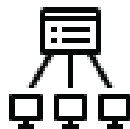

We continue investing in people and vendors to bring the latest digital and disruptive technologies with a localised footprint across the countries.

Our sales and technical expertise with a huge experience in distribution helps us in delivering partner profitability and customer expectations.

Siemon is an industry leader in manufacturing and innovation of high-quality,

High-performance low-voltage infrastructure solutions for data centers,

Intelligent buildings, enterprise LAN & wireless systems.

Website

Advanced Data Center Solutions

These products & solutions have been designed from the ground up to support your data center requirements for now and the future. All backed up by Siemon's industry-leading quality, performance and reliability they combine to help you reduce risk, maximize uptime and successfully deliver new applications and services.

Cabling Solutions for Intelligent Buildings

ConvergeIT solution from Siemon brings together an advanced cabling system and intelligent building program expertise with a team of like-minded innovative building system partners and certified Digital Lighting Partners (DLPs) to help customers around the world build profitable intelligent buildings and a better future by changing the way we build.

Enterprise LAN & Wireless

Comprehensive line of physical layer infrastructure solutions for the enterprise LAN: end-to-end twisted pair copper and optical fiber cabling systems; racks, cabinets, and cable management; work area problem solvers, and more – all designed to ensure that our customer's LAN's are backed by a high-performance, reliable, future-proof cabling infrastructure.

Siemon's innovative, craft-friendly connectivity solutions provide the quality and performance essential to faster, reliable deployments of small cell, macro cell, mec, wi-fi and das systems.
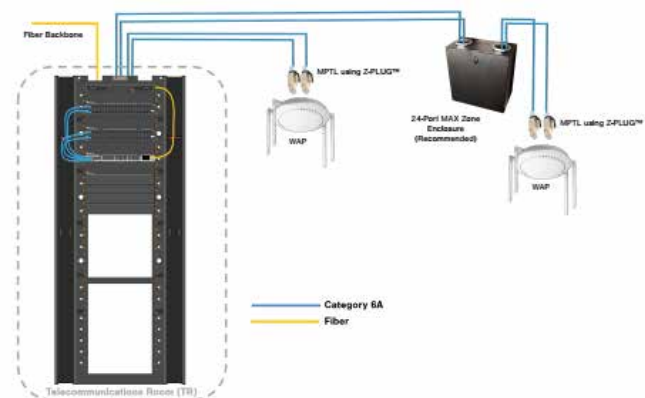

GIGANET is a Global brand built on high quality, innovation, reliability, scalability, customer focus and high performance End to End Solution for Cabling Infrastructure for SMART Intelligent buildings, Backup Power and Data Centres. The GIGANET brand is designed and manufactured based on international standards and certification.

Website

Data Centre Systems

The GIGANET Networks Cabinet range is supplied with a glass/mesh front and steel rear door. The range is designed with features, and functionality which make it ideal for LAN and security cabling installations and the housing of 19" mounted equipment such as switches, routers, storage and recording devices. The GIGANET Edge Micro Data Centre is a fully intergrated Data Centre in a Single Rack

Copper and Fibre Optic Systems

The GIGANET Copper Cabling Systems are designed for high performance 10G LAN and Data centre cabling with both Unshielded and Shielded systems with copper cables, copper trunks, connectivity and termination plug.

The GIGANET Fiber Optic Systems are designed for high performance LAN, FTTX and Data centres with 10G / 40G / 100G inter-connect with single mode Fibre, Multi-mode fibre and Fibre plug n Play solutions.

Power Systems

GIGANET provides power solutions ranging from Backup Power both single phase and three phase UPS. A wide range of Power Distribution Units from standard PDUs in a variety of configurations to modular designs that provide greater flexibility and a choice of intelligent PDUs that allow you to monitor, manage and measure your power consumption.

11 Fire Suppression

The Datacomms Network (DCN) is a UK brand which has been designed for physical security and SME office LANS to provide cost effective, high quality, high performance systems at a competitive price with 25 years warranty.
The DCN cabling system provide a robust LAN which integrates Physical Security with Data Points for Wired and Wireless systems powered by Power over Ethernet (POE) equipment providing GIGABIT speeds.

DCN Cables

DCN indoor and outdoor copper cable provide high-performance and cost-effective solutions for physical security and LANS for smart Buildings.
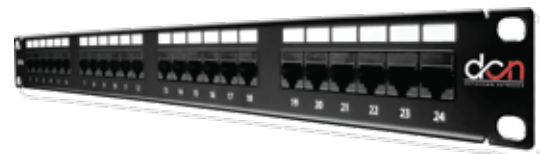

DCN Wall Mounted Cabinets

The single section cabinets are available in 6U ,9U and 12U with 6 way Metal PDU and are ideal for NVR and Network Equipment at floor level.

DCN CAT 6 24 Port Patch Panel

The DCN Patch Panel with cable manager provides a reliable and efficient way to terminate and manage cables .

DCN CAT 6 Patch Cord

The CAT 6 high performance Patch Cords are used to connect to patch panel and premises equipment to provide excellent channel performance .

DCN CAT 6 Toolless Key Stone

The Toolless Keystone is designed for ease of terminating CAT 6 cables and providing high channel performance.

DCN 2 Port Faceplate

The dual UK type shuttered faceplate made from high-impact ABS plastic holds two keystones with Label identifier for data and voice application .

Rittal is a global leader in enclosures, offering essential IT infrastructure like server racks and cooling systems. They protect sensitive electronics in industrial and industrial automation settings.

Website

Cabinets & Enclosures

Beat the competition with our enclosure and case system, distinguished by its simplicity, assembly-friendliness and versatile functions.

Power distribution

Play it safe with super-flexible power distribution technology. Our tested solutions stand out from the crowd with their simple, safe assembly and user-friendly planning.
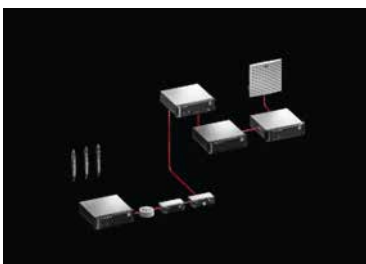

IT Infrastructure

Future-centric solutions for your IT infrastructure are efficient, secure and scalable. Rittal supplies customized complete solutions across the entire spectrum, from micro data centres through to data centres in containers.

Monitoring

Get a better overview of your IT infrastructure with our flexible, individual solutions for controlling and monitoring all physical parameters in the IT environment. IT security is now inextricably linked with the Computer Multi Control (CMC) monitoring system.

Power Distribution Unit (PDU)

With the compact PDU, any IT rack is equipped with an intelligent rack power distribution system. Tool-free installation in the zero-U space of the IT server racks.

Climate control

Boost your efficiency and protect the environment at the same time with our energy-saving, eco-friendly climate control solutions for enclosures and machines. Climate control concepts from Rittal cover the full spectrum of applications, from cooling a single rack through to entire data centres.

Worldwide leader in certification, troubleshooting, and installation tools for professionals who install and maintain critical network cabling infrastructure. From installing the most advanced data centers to restoring telephone service after a disaster, our combination of legendary reliability and unmatched performance ensures that jobs are done efficiently

Website

Cabling Certification

Everything you need to certify, manage and report on your cable installation projects.

Installation and Test

Hardware and software for enterprise testing, monitoring, diagnostics, analysis, reporting, and application performance management across LANs, WANs, and wireless networks.

Network Troubleshooting

Rugged installation and testing tools to support telecommunications services.

![Sunbird]

Get infrastructure work done faster, sustainably, and more accurately with full-circle capabilities. Look at what Sunbird's Award-Winning DCIM Solution Can Do for You.

With a focus on real user scenarios for real customer problems, we help data center operators manage tasks and processes faster and more efficiently than ever before, while saving costs and improving availability.

Website

Asset
Accurately track all assets across all global data centers.

Power
Reduce downtime and find stranded capacity with complete power monitoring.

Capacity
Quickly see space, power, network connectivity, and cooling capacity.

Visiualization
See 3D views that display eveything from a bird's eye view of the data center floor.

Change
Manage, validate, and report on change requests and work orders.

Security
Secure cabinets electronic door locks, auditing, surveillance, and role - based permissions.

Energy
Boost energy efficiency, reduce costs, and drive energy-saving initiatives.

BI & Analytics
Explore zero - configuration dashboards and visual analytics that work right out of the box.

Environment
Intelligent monitoring to help you maintain the health of your data center.

Connectivity
Manage power and network connectivity with visual trace routes, cable measurements and port connectivity.

ARISTA

Arista Networks is an industry leader in data-driven, client to cloud networking for large data center, campus and routing environments. Arista's award-winning platforms deliver availability, agility, automation, analytics and security through an advanced network operating stack.

Website

Data-Driven Cloud Networking

Data-driven cloud networking uses an open approach to cloud networking around a single consistent software platform, the Arista EOS® network stack, and network data lake architecture (NetDL™), with the application of artificial intelligence and machine learning (AI/ML) to automation and security challenges.

Cognitive Campus Workspaces

We are witnessing a massive transition in the post pandemic era of blurring the lines between the office, home, tele-worker in transit and users into elastic workspaces. Arista's Cognitive campus as a service is based on a data driven architecture and offers consistent, unified management across the campus edge for wired and wireless networks as well as integrated security & proactive network assurance.

Security

A new age of edge-less, multi-cloud, multi-device collaboration for hybrid work has given rise to a new network that transcends perimeters. As hybrid work models continue to gain precedence through the new network, it has become vital for organizations to address the cascading attack surface. Continuously evolving cyber threats can no longer be mitigated by reactionary bolt-on security measures. Instead, organizations need security to permeate everything that happens on the network today.

Ruijie has been building in-depth scenario-oriented application experience through solution design and innovation in the industry, thus assisting the upgrade into the digitalization of all industries. Ruijie dedicates in the R&D, design, and sale of network devices, network security products, and cloud desktop solutions.

Website

Ruijie Cloud

Whether it's an on-site data center, a colocation space, or a hyperscale environment, we support our clients data center requirements by delivering world-class IT infrastructure that truly connects people to a higher standard. Our mix of end-to-end structured cabling, high speed interconnects, and expert design services will help support your journey to 400/800G and beyond.

Switches, Gateways & Routers

Ruijie Networks, as one of the earliest switch suppliers in China, has orchestrated multiple full-featured switch series for data center network and campus network. Currently, Ruijie switches have been widely adopted across various sectors including internet, finance, network operator, government, education, enterprises, healthcare, etc. RSR router series that incorporates routing, switching, VPN, firewall, transmission and application platform into one multi-service and high-reliability router, which can support various routing scenarios, including core, aggregation and access.

Access Points

Ruijie strives to be the industry-leading scenario-oriented Wi-Fi solution provider with great capacities in depriving the business world of any network problems, and earns the top place in the market share powered by the unsurpassed and robust products.

Reyee is a sub-brand launched by Ruijie for the SMB (small and midsize business) market. "Reyee" means "Redefine your easy network". We are a vendor of ICT infrastructure and sub-industry network solutions. In recent years, Reyee has achieved rapid market breakthroughs and growth in the field of SMB international network products.

Website

Reyee Router Family

Reyee Wireless Family is a series of innovative wireless products designed to enhance connectivity and convenience within households.With a focus on seamless integration, user-friendly interfaces, and reliable performance, Reyee Wireless Family aims to simplify daily routines and elevate the connected home experience.

Reyee Mesh Wi-Fi Family

With its mesh network technology, it eliminates dead zones and ensures consistent internet access across multiple devices. Easy to set up and manage, Reyee Mesh Wi-Fi Family is designed to provide fast and stable internet for your entire household, making streaming, gaming, and browsing a breeze.

Air Metro Solution

Reyee Wireless Family is a series of innovative wireless products designed to enhance connectivity and convenience within households.With a focus on seamless integration, user-friendly interfaces, and reliable performance, Reyee Wireless Family aims to simplify daily routines and elevate the connected home experience.

Wi-Fi Access Points that provide unmatchable connectivity with embedded security. We hope & wish to constantly develop more & more, newer things for our tech-savvy and not-so-tech-savvy audience learning and unlearning things as growth takes over.

Website

Ray One

The Ray ONE developed at and for enterprise-levels introduces you to features that they excel in, simplifying tasks for you and your customers.

Access Points

Ray provides new generation cloud managed wireless access points. Its access points cater to all industries and enhances their business with AI features.

Switch

Ray switches bring wired and wireless together to drive digital transformation, dramatically simplify operations and continuously optimize to support business goals.
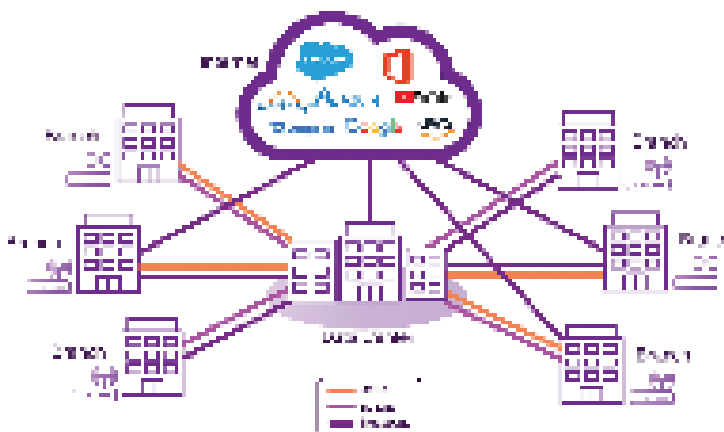

SD WAN

SD-WAN solution offered by Ray, a company specializing in network security and optimization. This technology enables organizations to efficiently manage and optimize their wide area network connections, providing enhanced security, reliability, and performance for distributed networks.

We are Teltonika IoT Group, the company group that develops exceptional Internet of Things solutions for the global market. More than 20 million IoT devices, designed in our Lithuanian offices and manufactured in our modern production facilities, are already connected to the Internet.

Website

Teltonika Telematics

World-leading tracking hardware for aftermarket and OEM applications. From easy track & trace to professional CAN bus data reading, we cover it all.

Teltonika Networks

Professional networking equipment with Cellular 4G LTE and Wi-Fi Connectivity for challenging enterprise, IoT, M2M and Industry 4.0 Applications

Teltonika Telemedic

We develop enhanced professional telemedicine and telecare solutions, such as smart medical bracelets and lung ventilation devices, and strive to make them more affordable and accessible to people and healthcare facilities.

Teltonika EMS

We are an agile, reliable and devoted partner in Electronics Manufacturing Services & Original Design Manufacturing. Our engineering and production teams work side by side to implement any complex ideas of our clients.

Teltonika High-Tech Hill

We aim to encourage cooperation between science and business, foster the development and growth of young talents, and help them build successful careers in technology. Together with Lithuanian universities, we conduct research, promote technological advancement, and organize internships and scholarships.

Teltonika Energy

At Teltonika Energy, we develop innovative electric vehicle charging solutions to enable more efficient and sustainable driving, effectively contributing towards the reduction of CO_2 emissions.

24online Info Technologies is the global provider of 24online Hospitality Internet Access (HIA) and 24online Service Management System (SMS) that caters to ISPs, Hotels, Enterprises, Airports, Malls, and various public Wi-Fi Hotspots in varied networks like Wired, Wi-Fi and VSAT.
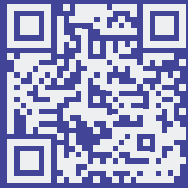

Website

Comprehensive Solution for Major ISPs

24online offers comprehensive solution for ISPs to offer customized business plans and new revenue generating platform using pre-paid coupons based on hours/days, data usage and discounts.

Solution for Hotels & Hotspots

24online Hospitality Internet Access (HIA) series offers advance access controllers with fully furnished guest management features and internet billing functions for hoteliers and single or chain of hotspots.

## ISP CRM Solution

With the continued growth and ever demanding subscriber base, it is imperative for ISPs to have a proven and scalable CRM in place. 24online Service Management System (SMS) introduced Customer Relationship Management (CRM) for its large ISP clientele of 24online with features like trouble ticketing, customer acquisition, workflow management, calendar & alerts and admin dashboard.

GIGA COMPUTING

Giga Computing Technology is an industry innovator and leader in the enterprise computing market. Having spun off from GIGABYTE, we maintain hardware expertise in manufacturing and product design, while operating as a standalone business that can drive more investment into core competencies.

We offer a complete product portfolio that addresses all workloads from the data center to edge including traditional and emerging workloads in HPC and AI to data analytics, 5G/edge, cloud computing, and more. Our longstanding partnerships with key technology leaders ensure that our new products will be the most advanced and launch with new partner platforms. Our systems embody performance, security, scalability, and sustainability.
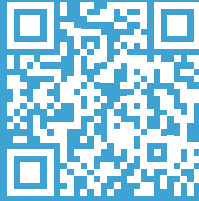

Website

GPU Server

Offering industry leading GPU density due to excellent thermal and mechanical design, and built for HPC, AI, and high-performance parallel processing

High-density Server

Combining four hot-swappable nodes in a 2U chassis, offering extreme CPU compute density excellent for HPC, HCI, and edge computing

Storage Server

Designed to accommodate an incredible volume of hard drives and to be compatible with modern storage software

Rack Server

1U and 2U general-purpose systems, offering the best balance of compute, memory, storage, and expandability

Edge Server

1U and 2U short depth servers, moving data collection away from data centers and improving latency

Tower Server / Workstation

Deliver simplicity, versatility and high performance for animation studios, and software developers

Direct Liquid Cooling

Efficient cooling & heat dissipation for performance demanding servers are possible with direct to chip liquid cooling

Immersion Cooling

Submerging servers, for any enterprise application, in a single-phase immersion cooling solution produces the most efficient outcome

Motherboard

Single and dual socket options supporting Gen4/ Gen5 NVMe drives and PCIe 4.0 and/or 5.0 lanes

QNAP (Quality Network Appliance Provider) is devoted to providing comprehensive solutions in software development, hardware design and in-house manufacturing.
Focusing on storage, networking and smart video innovations, QNAP now introduces a revolutionary Cloud NAS solution that joins our cutting-edge subscription-based software and diversified service channel ecosystem.

Website

Storage

Whether it's an on-site data center, a colocation space, or a hyperscale environment, we support our clients data center requirements by delivering world-class IT infrastructure that truly connects people to a higher standard. Our mix of end-to-end structured cabling, high speed interconnects, and expert design services will help support your journey to 400/800G and beyond.

Networking

With increasing file sizes and a growing number of devices on networks, the need for affordable high-speed network devices is increasing. QNAP now offers affordable options to upgrade your existing network with high-speed routers, network switches, PCIe network cards and adapters.

Expansion Accessories

Versatile feature-rich accessories to enhance the performance of your system.

SOPHOS

Powered by threat intelligence, AI and machine learning from SophosLabs and SophosAI, Sophos delivers a broad portfolio of advanced products and services to secure users, networks and endpoints against ransomware, malware, exploits, phishing and the wide range of other cyberattacks.

Website

Managed Detection and Response (MDR)

Sophos Managed Detection and Response (MDR) is a fully managed 24/7 service delivered by experts who detect and respond to cyberattacks targeting your computers, servers, networks, cloud workloads, email accounts, and more.

SD WAN

Sophos Firewall and our Secure Access portfolio of products, all managed and orchestrated through Sophos Central, enable your SD-WAN networking goals simply and economically while offering zero-impact response to ISP disruptions and outages, even in the most challenging environments.

Network Security

Trust your inbox again with cloud email security that protects your people and critical information from malware, as well as malware-free phishing and impersonation attempts.

SOPHOS

Powered by threat intelligence, AI and machine learning from SophosLabs and SophosAI, Sophos delivers a broad portfolio of advanced products and services to secure users, networks and endpoints against ransomware, malware, exploits, phishing and the wide range of other cyberattacks.

Website

End Point Security

Endpoint Description: Prevent Breaches, Ransomware, and Data Loss with Sophos Intercept X Advanced. Add to it powerfull XDR tools to let your organization hunt for, investigate, and respond to suspicious activity and indicators of attack.

Cloud

Cloud workload protection with CPSM processes to moniter systems and infrastructure.

Email

Protection from malware , phishing, and impersonation attempts.

Virtuozzo

VIRTUOZZO Hybrid Infrastructure is a turnkey cloud platform that offers fast, affordable, easy to use cloud solution for service providers, ISVs & SMEs. It makes it easy to build , manage and sell your own brand of cloud services.

Website
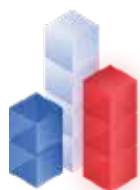

Infrastructure as a service
Openstack - based public cloud with pay- as - you go or instant based pricing.

Platform as a service
Elastic, containerized cloud with automatic scaling, clusterization and CI / CD intergration.

Kubernetes as a service
High performance Kubernetes clusters with automated provisioning, scaling and updates.

Database as a service
Automated database provisioning , clustering, scaling & updates for your customers.

Wordpress as a service
High performance wordpress installations with automated scaling and clustering.

Multi Cloud Management
Unified application management across multiple clouds with full interoperability.

S3 Storage as a service
Scalable S3 - compatible object storage for your projects.

Back up as a service
Back up and Disaster recovery powered by Acronis Cyber Protect Cloud.

Mitel

Supercharge your organization's growth with unified communications, collaboration and customer experience technology. With Mitel's next gen solutions, you can enable new ways of working, supporting your employees to call, chat & video securely — also stay connected regardless of whether they sit next to each other in the office, or remotely at home.

Website

Unify OpenScape Xpert V8

OpenScape Xpert is a reliable, secure, multi-line communications solution designed for supporting time-critical communication needs of financial, energy, and commodity trading as well as dispatchers such as control centers or public safety communication operations. With its customizable user interface and powerful multiline capabilities it helps increase worker efficiency and productivity, while reducing operational costs and complexity.

The all-in-one Unified Communications Solution

UC takes all the ways your people communicate - email, phone, fax, instant messaging, video conferencing and more - and integrates them into a single place. There's no need to switch between screens, programs, contact lists, email accounts and all the other things that can slow down even the simplest communications.

Openscape Business

Unify OpenScape Business Offers a future proof all-in-one Unified Communication solution tailored for small to medium -sized enterprises. It enhances productivity through seamless intergration of voice, messaging, mobility, and team collaboration tools. With its scalable and user-friendly platform, businesss can streamline operations, reduce costs, and ensure reliable, high quality communication across all devices.

Mitel is a global leader in business communications with a broad portfolio offering world-class communications, collaboration, and contact center solutions. It is a leader in the UC space with over 35 million global users across 100 countries, including more than 7 million cloud users worldwide.

Website

MiCollab

Get a powerful suite of enterprise-class messaging services that includes chat, group chat, team messaging, voicemail, automated attendant, and fax solutions to streamline advanced call processing, voicemail notification and retrieval, and more.

MiContact Center Business

Everything you need to operate a world class customer experience center including built-in Workflow Designer, Speech IVR, AI-powered Chatbots and Agent Assist, Interaction Recording, Quality Management, Workforce Management, Historical Reporting and Real-Time Dashboards.

MiContact Center Enterprise

Aggregate multiple High Availability servers under a resilient network operation center (NOC) style environment for large-scale, dispersed deployments of up to 30,000 concurrent agents.

A pioneer of modern video technology, PeopleLink, after accomplishing its pan India coverage is now expanding its Global operations. Its range of offerings includes next generation Video technology and Audio Video peripherals across a wide range of focused industry verticals. PeopleLink offers the most robust customer / partner service in the Industry today.

Website

Video Conferencing Solutions

4K Ultra High Definition Video conference, allows members to join the call directly from web browser, Built-in microphone. Distribute incoming videos across two connections.

Video Collaboration Suite

InstaVC is video conferencing solution which offers multi-party conferencing with impeccable audio clarity and videos of up to 4K at optimized bandwidths. Through InstaVC, you can collaborate with your team instantly. You can make effective presentations, have productive discussions, and come up with unique ideas to boost your business.

InstaVC Suite

The perfect Video Collaboration solution with high quality and security, empowering impeccable & easy-to-use virtual communication platforms.

25

vtech

VTech is the global leader in electronic learning products from infancy to preschool and the world's largest manufacturer of cordless phones. Our mission is to design, build and supply innovative and high-quality products in a way that minimizes impact on the environment, while creating sustainable value for our stakeholders and the community.

Website

Guest Room Phones

VTech Hospitality offers a wide range of guest room phones - perfect for today's modern hotel rooms. When you choose VTech, you're also choosing world-class service and support, green standards and antibacterial phones backed by 46 years of telecom experience. Select from next gen analogue and SIP models, the latest features and customizable face plates.

Contemporary Models

Sophisticated room phones for luxury hotels.

Bespoke Models

The room phones of choice in hotels worldwide.

Next Gen Corded Models

VTech room phones - keeping you and your guests in touch, in style.

Next Gen Cordless Models

Clear communication, cordless freedom, sleek modern design.

Redefining energy management and shaping the future of utilities with a smarter approach.

Wirelessly connect your assets and people to any networks to harness the power of data.

Website

Door Phones & Intercoms

Fanvil Audio & Video IoT (A&V-IoT) products, with intelligent and powerful product performance and convenient and comfortable user experience, meet the application needs of enterprise users in various scenarios. It is a high-quality choice for the enterprise market.

SIP Phones

Fanvil SIP desk phones include three product series X, XS, XU and H, Covering full range production from entry level to high end IP phones.

LINKVIL Wireless UC Products

LINKVIL builds a wireless communication Eco-system for multi-scenarios to help accelerate digital transformation requirements by delivering world-class IT infrastructure that truly connects people to a higher standard. Our mix of end-to-end structured cabling, high speed interconnects, and expert design services will help support your journey to 400/800G and beyond.

![ring - an amazon company]

Ring is a leading provider of home security products and services, specializing in video doorbells, security cameras, and related accessories. Ring's products are designed to help customers keep their homes and loved ones safe, whether they are at home or away, including indoor and outdoor cameras, floodlight cameras, and spotlight cameras.

Indoor Cameras

Versatile protection and personalized peace of mind. That's Indoor Cam (2nd Gen). Get the whole picture in real time with 1080p HD video and Color Night Vision, right from your phone. Or keep the picture private by using the manual, removable privacy cover to turn off audio and video with a simple swivel.

Outdoor Cameras

Say bye-bye to blind spots. Spotlight Cam Plus is your go-to protection for any out-of-sight area thanks to Color Night Vision, customizable Motion Detection, and a pair of bright, motion-activated lights.

Door bell

Answer the door from anywhere with our smallest wired doorbell camera yet. Video Doorbell Wired includes all the essentials— HD video and Two-Way Talk, advanced motion detection, and real-time alerts sent straight to your phone, Alexa device, or Ring Chime so you'll always know when someone stops by.

ZKTECO is an internationally renowned enterprise which specializes in pioneering biometric recognition techniques, and provides products and solutions of smart entrance management, smart identity authentication and smart office. ZKTeco offers services on all fronts to public-service, enterprise-level and personal users.

Website

ZKTeco **ZKDIGIMAX** **IOT** **ARMATURA** **ZKBio CVSecurity**

Intergrated Physical Smart Security Solutions

ZKBioCVSecurity provides a comprehensive web-based security platform with the adoption of hybrid biometric and computer vision technology. It contains multiple modules: Personnel, Time & Attendance, Access Control, Visitor Management, Parking, Elevator Control, FaceKiosk, Intelligent Video Management, Mask and Temperature Detection Module, Online/Offline Consumption, Patrol, Intelligent Scenes, Operation Center, Service Center, and other smart sub-systems.

Smart Home / IOT

ZKTeco Smart Home/IoT provides a comprehensive solution for modern living, integrating advanced technology into daily life. Focused on security, convenience, and energy efficiency, users can remotely control and monitor their homes via intuitive mobile apps. From smart locks and security cameras to climate control and lighting, ZKTeco enables personalized, secure environments, compatible with other IoT devices.
